

FEARLESS

Fully Adjustable Concealable Side-Opening Design

Redefining Performance Excellence

The KDH Fearless Concealment Carrier is a premium option to be used with KDH's Fearless line of ballistics. The Fearless ballistic models are the lightest and thinnest in the industry. The Fearless Concealment Carriers is constructed using the lightest weight Nylon fabric available along with a mesh liner. The Fearless Concealment Carrier features a proprietary yoke design which offers superior comfort and concealment by masking the armor profile typically seen through the wearers shirt. Additionally, the Fearless yoke increases the adjustability and load distribution of the armor.

Features

- 100% Ultra Lightweight Nylon fabric with DWR (water repellent) finish. Machine washable.
- Mesh Liner featuring DRI-Lex moisture management technology and Aegis anti-microbial
- Side opening design
- Low Profile Shoulder tabs
- Integrated internal waistband offers comfort and ease of adjustment. The internal waistband also ensure the vest is worn properly by forcing the front panel to overlap the rear panel for optimal protection.
- Seamless zip closure to insert ballistic panels
- Front and back mesh tails
- 6x8 soft trauma pad included
- Hidden trauma plate pocket to reduce armor profile through shirt.

Options

- Male/Female Design, colors Black, Navy or White *
*additional color options may be available with supplemental materials.
